GLOBAL OUTLOOK

The global economy remains in a precarious state amid the protracted effects of the overlapping negative shocks of the pandemic, the Russian Federation’s invasion of Ukraine, and the sharp tightening of monetary policy to contain high inflation. Global financial conditions have tightened as a result of policy rate hikes and, to a lesser extent, recent bouts of financial instability.

Energy prices have eased considerably since their peak in 2022 on account of weaker global growth prospects and a warmer-than-expected Northern winter, which reduced natural gas and electricity consumption. Metal prices increased in early 2023, reflecting signs of a stronger-than anticipated recovery in China, but subsequently retraced those gains. Pressures on global supply chains have abated as goods demand has weakened and global shipping conditions have improved. Energy prices have eased considerably since their peak in the third quarter of 2022. A warmer-than expected northern hemisphere winter reduced natural gas and electricity consumption, especially in Europe. Energy prices could be lower if global demand is weaker than expected. In this respect, prospects in China play a particularly important role, as it is expected to account for more than half of the increase in global oil demand in 2023. On the upside, risks to the price forecast relate to a lack of expansion in U.S. oil production, low levels of spare capacity among OPEC members, and to the possibility that the cartel may decide to cut output further.

INDIAN ECONOMY

Global economic recovery was well on track until the Russia-Ukraine conflict broke out in February 2022. The conflict has now continued for almost a year, disrupting the restoration of the supply chains disrupted earlier by lockdowns and limited trade traffic. In the last eleven months, the world economy has faced almost as many disruptions as caused by the

pandemic in two years. The conflict caused the prices of critical commodities such as crude oil, natural gas, fertilisers, and wheat to soar. This strengthened the inflationary pressures that the global economic recovery had triggered, backed by massive fiscal stimuli and ultra-accommodative monetary policies undertaken to limit the output contraction in 2020. Inflation in Advanced Economies (AEs), which accounted for most of the global fiscal expansion and monetary easing, breached historical highs. Rising commodity prices also led to higher inflation in the Emerging Market Economies (EMEs), which otherwise were in the lower inflation zone by virtue of their governments undertaking a calibrated fiscal stimulus to address output contraction in 2020.

India's Economic Resilience and Growth Drivers

Monetary tightening by the RBI, the widening of the CAD, and the plateauing growth of exports have essentially been the outcome of geopolitical strife in Europe. As these developments posed downside risks to the growth of the Indian economy in FY23, many agencies worldwide have been revising their growth forecast of the Indian economy downwards. These forecasts, including the advance estimates released by the NSO, now broadly lie in the range of 6.5-7.0 per cent. Despite the downward revision, the growth estimate for FY23 is higher than for almost all major economies and even slightly above the average growth of the Indian economy in the decade leading up to the pandemic. IMF estimates India to be one of the top two fast-growing significant economies in 2022. Despite strong global headwinds and tighter domestic monetary policy, if India is still expected to grow between 6.5 and 7.0 per cent, and that too without the advantage of a base effect, it is a reflection of India's underlying economic resilience; of its ability to recoup, renew and re-energise the growth drivers of the economy.

2. Our Registered Office from where we operate is not owned by us.

Our Registered Office premise situated at 807, Titanium One, Nr. Pakwan Cross Road, Nr. Shabri water works, S.G. Highway, Bodakdev, Ahmedabad-380054, India is not owned by us, it is taken on lease rental basis, for period of 9 months commencing from April 01, 2023 to December 31, 2023 from one of our group entity M/s. Rajgor Agro Limited on monthly rental of ₹ 20,000/- per month.

We cannot assure you that we will be able to continue the above arrangement on commercially acceptable / favourable terms in future. If we are required to vacate the current premises, we would be required to make alternative arrangements for new office and other infrastructure, and we cannot assure that the new arrangements will be on commercially acceptable/favourable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

3. Our business is subject to seasonal volatility, which may contribute to fluctuations in our results of operations and financial condition.

The major raw material used in our manufacturing operations is Castor Seeds. Due to the seasonal availability of these castor seeds, our business is seasonal in nature. The period during which our business may experience higher revenues varies from season to season depending upon the availability and thereafter harvesting of this raw material. During the crop season, we are able to procure these raw materials at reasonable terms and in substantial quantities, whereas during the off-season their availability is less and also there are price variations. Accordingly, our revenue in one quarter may not accurately reflect the revenue trend for the whole Financial Year. The seasonality of Castor Seeds and its impacts may cause fluctuations in our result of operations and financial conditions.

4. Our cost of production is exposed to fluctuations in the prices of our raw material such as Castor Seeds.

We are mainly engaged in the business of manufacturing Refined Castor Oil First Stage Grade (F.S.G.), Castor De Oiled Cake and High Protein Castor De Oiled Cake for the domestic market. Castor Seeds is an important raw material required in the manufacturing of the abovementioned finished products. We source required raw material as mentioned above through domestic market. We are exposed to fluctuations in the price of the Castor Seeds and may be unable to control factors affecting the price directly or indirectly at which we procure such materials, particularly as we do not enter into any supply agreements with our suppliers. We also face the risks associated with compensating for or passing on such an increase in our cost of production on account of such fluctuations in price to our customers. Particularly, we do pass on the increase in the cost of production to our customers through a corresponding increase in the price of our products in order to maintain our historical margins.

5. We generally do business with our customers on a purchase order basis and do not enter into long- term contracts with most of them.

Our business is dependent on our continuing relationships with our customers. Our Company neither has any long-term contract with any of our customers nor has any marketing tie-up for our products. Further, our Company has not appointed any exclusive agents for its operations. Any change in the buying pattern of our end users or disassociation of major customers can adversely affect the business of our Company. The loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations.

6. The Company is dependent on few numbers of customers for sales. Loss of any of this large customer may affect our revenues and profitability.

Top ten customers of our company for FY2022-23, FY 2021-22 and FY 2020-21 contributed for 73.10%, 100% and 100%, respectively of our sales. Our Company is engaged in the business of manufacturing of castor products. Our business operations are highly dependent on our customers and the loss of any of our customers may adversely affect our sales and consequently on our business and results of operations. While we typically have long term relationships with our customers, we have not entered into long term agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with our customers and suppliers. The actual sales by our Company may differ from the estimates of our management due to the absence of long term agreements. The loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash

flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Any decline in our quality standards, growing competition and any change in the demand, may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, and the loss of business from one or more of them may adversely affect our revenues and results of operations.

However, the composition and revenue generated from these customers might change, as we continue to add new customers in the normal course of business. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new customers, there can be no assurance that we will be able to maintain long term relationships with such customers or find new customers in time.

- 7. *We highly depend on our major raw materials and a few key suppliers who help us procure the same. Our Company has not entered into long-term agreements with its suppliers for supply of raw materials. In the event we are unable to procure adequate amounts of raw materials, at competitive prices our business, results of operations and financial condition may be adversely affected.***

We depend on a few suppliers for procurement of raw materials, required for manufacturing our products. Top ten suppliers of our company for FY2022-23, FY 2021-22 and FY 2020-21 contributed for 79.65%, 47.61% and 18.35%, respectively of our purchases.

We have not entered into long term contracts with our suppliers and prices for raw materials are normally based on the quotes we receive from various suppliers. Since we have no formal arrangements with our suppliers, they are not contractually obligated to supply their products to us and may choose to sell their products to our competitors. Non-availability or inadequate quantity of raw material or use of substandard quality of the raw materials in the manufacture of our products, could have a material adverse effect on our business. Further, any discontinuation of production by these suppliers or a failure of these suppliers to adhere to the delivery schedule or the required quality and quantity could hamper our manufacturing schedule. There can be no assurance that strong demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials to us. Further, we cannot assure you that our suppliers will continue to be associated with us on reasonable terms, or at all. Since our suppliers are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms to such suppliers, which may cause them to cater to our competitors alongside us.

- 8. *The price, at which we are able to obtain the raw material for manufacture of our finished products depend largely on prevailing market prices. Increase in costs of our raw materials could have a material adverse effect on our Company's sales, profitability and results of operations.***

Our Company is dependent on third party suppliers for procuring raw materials. We are exposed to fluctuations in the prices of the raw materials as well as its unavailability, particularly as we typically do not enter into any long-term supply agreements with our suppliers and our major requirement is met in the spot market. We may be unable to control the factors affecting the price at which we procure the materials. We also face the risks associated with compensating for or passing on such increase in our cost of production on account of such fluctuations in prices to our customers. Upward fluctuations in the prices of raw material may thereby affect our margins and profitability, resulting in a material adverse effect on our business, financial condition and results of operations. Though we enjoy favourable terms from the suppliers both in prices as well as in supplies, our inability to obtain high quality materials in a timely and cost-effective manner would cause delays in our production and delivery schedules, which may result in the loss of our customers and revenues.

- 9. *We conduct our business activities on a purchase order basis and therefore, have not entered into long-term agreements with our customers.***

Our Company is engaged in the business of manufacturing of castor oil. We have not entered into any formal agreements, arrangement or any other understanding with our customers or our traders and therefore, our business is dependent upon the continuous relationship with the customers, our traders and the quality of products supplied to us. Further, neither do we have any exclusive agents, dealers, distributors nor have we entered into any agreements with any of the market intermediaries for selling or marketing the products. If there occurs any change in the market conditions, market trends, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers' demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

- 10. *Our company has availed credit facility from banks, and it is subject to certain restrictive covenants. Any Delay in issuing No Objection Certificate for the proposed issue may delay our proposed Initial public offering.***

As on date of this Draft Red Herring Prospectus, we avail credit facilities from various Banks and Financial Institutions. We have entered into mortgage agreement with our lender and the covenants in borrowings from bank / lenders, among other things require us to obtain prior permissions in writing in respect of, including, but not limited to effecting any change in the management/Board of the Company, declaration of dividend, capital structure of the Company; undertake any new project, implement any scheme of expansion or acquire fixed assets, enter into borrowing arrangement either secured or unsecured with any other bank/financial institution/Company or otherwise, formulate any scheme of amalgamation, acquisition, merger, or reconstruction etc. We have applied to our lenders for No Objection Certificate (NOC) for our proposed Initial Public offer, for which their NOC is awaited. In an event, Lender's delay in granting their NOC, it will delay our proposed Initial public offering which may delay our Schedule of Implementations and consequently impact our functioning to that extent.

11. *We require a number of approvals, NOCs, licenses, registrations and permits in the ordinary course of our business. Any failure or delay in obtaining the same in a timely manner may adversely affect our operations.*

We require a number of approvals, licenses, registrations and permits in ordinary course of our business. Additionally, we need to apply for renewal of approvals which expire, from time to time, as and when required in the ordinary course. In case of delay or failure to obtain the same, it could affect our business operations.

Any failure to renew the approvals that have expired, or to apply for and obtain the required approvals, licenses, registrations or permits, or any suspension or revocation of any of the approvals, licenses, registrations and permits that have been or may be issued to us, could result in delaying the operations of our business, which may adversely affect our business, financial condition, results of operations and prospects. For more information, see chapter "Government and Other Statutory Approvals" on page 174 of this Draft Red Herring Prospectus.

12. *Changes in technology may render our current technologies obsolete or require us to make substantial capital investments.*

Our business is significantly dependent on the efficient and uninterrupted operation of our technology infrastructure that ensures smooth operations through various automated machines. Changes in technology may render our current technologies obsolete or require us to make substantial capital investments. Our technology and machineries may become obsolete or may not be upgraded in a timely manner, hampering our operations and financial conditions and we may lose our competitive edge. Although we believe that we have installed latest technology and that the chances of a technological innovation are not very high in our sector we shall continue to strive to keep our technology, plant and machinery in line with the latest technological standards. In the case of a newfound technology, we may be required to implement new technology or upgrade the machineries and other equipment's employed by us. Further, the costs in upgrading our technology and modernizing the plant and machineries are significant which could substantially affect our finances and operations.

13. *There have been some instances of non-filing/delays /incorrect filings in the past with certain statutory authorities. If the authorities impose monetary penalties on us or take certain punitive actions against our Company in relation to the same, our business, financial condition and results of operations could be adversely affected.*

In the past, there have been some instances of non-filings or incorrect filings or delays in filing statutory forms with the RoC, which have subsequently been filed along with the payment of additional fees, as specified by RoC. Except as mentioned in this Draft Red Herring Prospectus, till date, there has been no penalty levied on the Company for such delays/defaults. However, it cannot be assured that even in future no such penalty will be levied. Therefore, if the authorities impose monetary penalties on us or take certain punitive actions against our Company or its Directors / Officers in relation to the same, our business, financial condition and results of operations could be adversely affected.

14. *Our manufacturing facilities are located at Harij, Gujarat. Any delay in production at, or shutdown of, or any interruption for a significant period of time, in these facilities may in turn adversely affect our business, financial condition and results of operations.*

Our Company has its manufacturing facilities located at Harij, Gujarat. Though, we get uninterrupted power supply, skilled and semi-skilled labour, basic raw materials from the suppliers as specified by our customers, our success depends on our ability to successfully utilize these manufacturing facilities to its utmost capacities and deliver our products in order to meet our customer demands in a timely manner. Our manufacturing facilities are susceptible to damage or interruption or operating risks, such as human error, power loss, breakdown or failure of equipment, plant and machinery, power supply or processes, performance below expected levels of output or efficiency, obsolescence, terrorist attacks, acts of war, break-ins, natural disasters such as earthquakes and industrial accidents and other similar events beyond our control. Further, our manufacturing facility is also subject to operating risks arising from compliance with the directives of government authorities. Operating risks may result in personal injury and property damage and in the imposition of civil and criminal penalties. If our Company experiences delays in production or shutdowns due to any reason, including disruptions caused by disputes with its workforce or any external factors, our

Company's operations will be significantly affected, which in turn would have a material adverse effect on its business, financial condition and results of operations.

Further, the activities carried out at our manufacturing facilities may be potentially dangerous to our employees/labors. While we employ safety procedures in the operation of our manufacturing facilities and maintain what we believe to be adequate insurance, there is a risk that an accident may occur at our manufacturing facilities. An accident may result in personal injury to our employees, or the Labour deployed at our facilities, destruction of property or equipment, manufacturing or delivery delays, environmental damage, or may lead to suspension of our operations and/or imposition of liabilities. Any such accident may result in litigation, the outcome of which is difficult to assess or quantify, and the cost of defending such litigation can be significant. As a result, the costs to defend any action or the potential liability resulting from any such accident or death or arising out of any other litigation, and any negative publicity associated therewith, may have a negative effect on our business, financial condition, results of operations, cash flows and prospects.

15. *Our inability to maintain distribution network can adversely affect our Revenues.*

We sell our products with the help of the distribution network of various dealers and distributors. The distribution network sells our products to end users. Our inability to maintain our existing distribution network or to expand it further as per the requirement of our proposed increased capacities can adversely affect our Revenues. In case, if we are not able to market our manufactured products, it may affect our operations and profitability adversely.

16. *Any defects in our products could make our Company liable for customer claims, which in turn could affect our Company's results of operations.*

Our Company is bound by the terms and conditions as stated in the purchase order placed by its customers. There are no specific regulations governing the supply of the same, other than the general law of contracts. Any claims made by these customers for defects in the products, would be subject to these terms and conditions, which are in the nature of normal contractual obligations in India. Any violation of these obligations could impact our Company's results of operations and financial conditions.

17. *We depend on certain brand names and our corporate name and logo that we may not be able to protect and/or maintain.*

Our ability to market and sell our products depends upon the recognition of our brand names and associated consumer goodwill. We have not yet applied for trademark registration for our Corporate Logo and Corporate Name. Consequently, we do not enjoy the statutory protections accorded to registered trademarks in India for our Company. There is no guarantee that the application for registration of our logo will be accepted in favour of the Company. This may affect our ability to protect our trademark in the event of any infringement of our intellectual property. In the absence of such registrations, competitors and other companies may challenge the validity or scope of our intellectual property right over these brands or our corporate name or logo. As a result, we may be required to invest significant resources in developing new brands or names, which could materially and adversely affect our business, financial condition, results of operations and prospects. In addition to same, our failure to comply with existing or increased regulations, or the introduction of changes to existing regulations, could adversely affect our business, financial condition, results of operations and prospects.

18. *Non-compliance with amendment in Safety, Health and Environmental laws and other applicable regulations, may adversely affect the Company's results of operations and its financial condition.*

Our company is in the business of manufacturing of castor derivatives. Due to nature of Business, the company is subject to various rules and regulations in relation to safety, health and environmental protection including Air Prevention and Control of Pollution Act, Noise Pollution and Water Prevention and Control of Pollution Act, Contract Labour Act, Employees Provident Fund Act, Bonus Act etc. Further, the company is subjected to the jurisdiction and is governed by Indian Law, rules and regulations in relation to safety, health and environmental protection due to the nature of the business of the company. These safety, health and environmental protection laws and regulations inter alia impose controls on air and water discharge, noise levels, storage handling, employee exposure to hazardous substances and other aspects of the Company's operations and products. Failure to comply with any existing or future regulations applicable to the Company may result in levy of fines, penalties, commencement of judicial proceedings and/or third-party claims, and may adversely affect the results of operations and financial condition.

19. *Our Company's failure to maintain the quality standards of the products could adversely impact our business, results of operations and financial condition.*

Quality Control Inspection is an integral part of our operations. We are required to implement quality management system in respect of all our Products. Our products depend on customer's specifications. Any failure to maintain the quality standards of our products may affect our business. Although we have put in place strict quality control

procedures, we cannot assure that our products will always be able to satisfy our customers' quality standards. Any negative publicity regarding our Company, or products, including those arising from any deterioration in quality of our products from our vendors, or any other unforeseen events could adversely affect our reputation, our operations and our results from operations.

20. Our business is dependent on the adequate and uninterrupted supply of electrical power and water at a reasonable cost. Failure on account of unavailability of electrical power and water may restrict us in utilizing our full capacity and hence, may impact our business and results of operations.

Adequate and cost-effective supply of electrical power is critical to our operations, which entails significant consumption of electrical power. Currently, we source power requirements by purchasing electricity from Uttar Gujarat Vij Company Limited (UGVCL) but there can be no assurance that electricity supplied by them will be sufficient to meet our requirements or that we will be able to procure adequate and uninterrupted power supply in the future at a reasonable cost. Further, if the per unit cost of electricity is increased by the state electricity board, our power costs will increase and it may not be possible to pass on any increase in our power costs to our customers, which may adversely affect our profit margins. We require ample water for various manufacturing activities. We source our water requirements by procuring the same from bore well. Lack of sufficient water resources or an increase in the cost of such water used in manufacturing facilities could adversely affect our business, financial condition and results of operations.

21. We operate in a competitive business environment, both globally and domestically. Competition from existing players and new entrants and consequent pricing pressures may adversely affect our business, financial condition and results of operations.

The Castor oil segment is highly competitive. Increasing competition may subject us to pricing pressures and require us to reduce the prices of our products and services in order to retain or attract customers, which may have a material adverse effect on our revenues and margins. Further, many of our competitors are larger international and domestic companies and have access to greater resources or may be able to develop or acquire technology or partner with innovators or customers at terms which are not presently feasible for us, due to our current scale of operations. Any failure to keep abreast of technological advancements might place our competitors at an advantageous position in terms of cost, efficiency and timely delivery of final products. While we are focused on developing cost and time efficiencies and to broaden our product range, in particular in certain niche segments, in the event our competitors develop better process technology or improved process yield or are able to source raw materials at competitive prices, and are therefore able to create new products or substitutes for our products at competitive prices, we may not be able to maintain our growth rate and revenues and our profitability may decline. Any of these factors may have a material adverse effect on our business and prospects.

22. Our Company requires significant amounts of working capital for continued growth. Our inability to meet our working capital requirements may have an adverse effect on the results of operations.

Our business is working capital intensive. A significant portion of our working capital is utilized towards inventories, trade receivables and trade payables. A brief summary of our working capital position based on our Restated Financials is given below:-

We intend to continue growing by reaching out to new customers and also increasing sales to existing customers and thereby reaching other geographical areas. All these factors may result in an increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital could adversely affect our financial condition and the result of our operations. For further details regarding working capital requirement, please refer to the chapter titled “Objects of the Offer” beginning on page 77 of this Draft Red Herring Prospectus.

23. Our Company has negative cash flows from its operating activities in the past 3 years, details of which are given below. Sustained negative cash flow could impact our growth and business.

Our Company had negative cash flows from its operating activities in the previous three years as per the Restated Financial Statements and the same are summarized as under:

Amount (Rs. In lakhs)

Particulars	For the year ended		
	Mar-23	Mar-22	Mar-21
Cash Flow from / (used in) Operating activities	(4,018.80)	734.01	(89.08)

The cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

24. Our Company is dependent on third party transportation for the procurement of raw materials and delivery of finished products and any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations.

Our Company uses third party transportation for procurement of raw materials and delivery of our finished products. Though our business has not experienced any disruptions due to transportation strikes in the past, any future transportation strikes may have an adverse effect on our business. These transportation facilities may not be adequate to support our existing and future operations. In addition, goods may be lost or damaged in transit for various reasons including but not limited to the occurrence of accidents or natural disasters. There may also be a delay in delivery of products which may also affect our business and results of operation negatively. An increase in the freight costs or unavailability of freight for transportation of our goods may have an adverse effect on our business and results of operations. Further, disruptions of transportation services due to weather-related problems, strikes, lockouts, inadequacies in the road infrastructure and port facilities, or other events could impair ability to procure goods on time. Any such disruptions could materially and adversely affect our business, financial condition and results of operations.

25. In addition to normal remuneration, other benefits and reimbursement of expenses to our Promoters and Directors; they are interested to the extent of their shareholding and dividend entitlement thereon in our Company and for the transactions entered into between our Company and themselves as well as between our Company and our Group Companies/Entities. Our Company in future may enter in related party transactions subject to necessary compliances.

Our Promoter – Directors are interested in our Company to the extent of their shareholding and dividend entitlement thereon in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. Our Promoter and Directors are interested in the transactions entered into between our Company and themselves as well as between our Company and our Group Company/Entity. All transactions with related parties entered into by the company in past were at arm’s length basis, in compliance with applicable provisions of Companies Act, 2013 and other applicable provisions. Our company, promoter and group companies may enter into such related party transaction in future as

well which may be or may not be at Arms' Length Price and in Ordinary Course of Business. If such future transactions are not on Arms' Length Price and in Ordinary Course of Business, our financial position may get affected to that extent. Additionally, our Company may enter in related party transactions in future subject to necessary compliances in accordance with relevant acts, rules and regulations. For details of transactions already executed by our Company with our Promoter, Directors and Group Companies/Entities during last three years, please refer to the “Annexure – 28 - Related Party Disclosure Under IND AS 24” under the chapter titled “Restated Financial Information” beginning from page no. 159 of this Draft Red Herring Prospectus.

26. *Our success depends heavily upon our Promoters, Directors and Key Managerial Personnel for their continuing services, strategic guidance and financial support. Our success depends heavily upon the continuing services of Promoters, Directors and Key Managerial Personnel who are the natural person in control of our Company.*

Our Promoters and Directors have a vast experience in the business undertaken by our company. They have established cordial relations with various customers and suppliers over the past several years, which have immensely benefitted our Company's current customer and supplier relations. We believe, our Promoters and Directors, who have rich experience in this industry, managing customers and handling overall businesses, has enabled us to experience growth and profitability.

We benefit from our relationship with our Promoters, Director and Key Managerial Personnel and our success depends upon their continuing services. We also depend significantly on our Directors and Key Managerial Persons for executing our day-to-day activities. The loss of any of our Promoters, Directors and Key Management Personnel, or failure to retain, recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors and Key Managerial Personnel, please refer to the chapter titled “Our Management” on page 136 of this Draft Red Herring Prospectus.

27. *Continued operations of our manufacturing facilities are critical to our business and any disruption in the operation of our manufacturing facilities may have a material adverse effect on our business, results of operations and financial condition.*

Our manufacturing facilities are subject to operating risks, such as unavailability of spare parts of the machinery, break-down, obsolescence or failure of machinery, disruption in power supply or processes, performance below expected levels of efficiency, labour disputes, natural disasters, industrial accidents and statutory and regulatory restrictions. In the event of a breakdown or failure of such machinery, replacement parts may not be available and such machinery may have to be sent for repairs or servicing. This may lead to delay and disruption in our production process that could have an adverse impact on our sales, results of operations, business growth and prospects.

28. *If we are unable to source business opportunities effectively, we may not achieve our financial objectives.*

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees, expand our distribution network and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It also is possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of the market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

29. *We may not be successful in implementing our business strategies.*

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and the results of operations.

30. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions, and cause serious harm to our reputation and the goodwill of our Company. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged

negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

31. *The average cost of acquisition of Equity Shares by our Promoters could be lower than the Issue price.*

Our promoter's average cost of acquisition of Equity Shares in our Company could be lower than the Issue Price as decided by the Company in consultation with the Book Running Lead Manager. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer chapter title "*Capital Structure*" beginning on page 52 of this Draft Red Herring Prospectus.

32. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.*

Since, the Issue size is less than Rs.10,000 lakh, there is no mandatory requirement of appointing an independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

33. *Within the parameters as mentioned in the chapter titled 'Objects of this Offer' beginning on page 77 of this Draft Red Herring Prospectus, our Company's management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.*

We intend to use Issue Proceeds towards financing the Working capital requirements of the Company, General Corporate Purpose and to meet the issue expenses. We intend to deploy the Net Issue Proceeds in FY 2024-25. The deployment of the fund is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc. For further details on the use of the Issue Proceeds, please refer chapter titled "*Objects of the Offer*" beginning on page 77 of this Draft Red Herring Prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company's Board of Directors. The fund requirement and deployment is based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled '*Objects of the Offer*' beginning on page 77 of this Draft Red Herring Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue. Our Audit Committee will monitor the proceeds of this Issue.

However, Audit Committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. However, in accordance with Section 27 of the Companies Act, 2013, a company shall not vary the objects of the Issue without our Company being authorised to do so by our shareholders by way of special resolution and other compliances in this regard. Our Promoters and controlling shareholder shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard.

34. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the issue. Further we have not identified any alternate source of financing the 'Objects of the Issue'. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date of this Draft Red Herring Prospectus, we have not made any alternate arrangements for meeting our capital requirements for the objects of the issue. We meet our capital requirements through our bank finance, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled "*Objects of the Issue*" beginning on page 86 of this Draft Red Herring Prospectus.

35. *Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.*

After completion of the Issue, our Promoters and Promoter Group will collectively own 60.02% of the Equity Shares. As a result, our Promoters together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority

shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our AoA. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

36. *Our Company has availed unsecured loans which are repayable on demand. Any demand for a loan from lenders for repayment of such unsecured loans, may adversely affect our cash flows.*

Based on Restated Financial Statement, our Company has unsecured loans as at March 31, 2023, amounting to Rs. 102.10 lakhs from Directors and their relatives and Rs. 233.49 Lakhs as Inter corporate Deposits that are repayable on demand to the relevant lenders as per restated financial statements. Further, some of these loans are not repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lender at any time. Any such unexpected demand or accelerated repayment may have a material adverse effect on the business, cash flows and financial condition of the borrower against which repayment is sought. Any demand from lenders for repayment of such unsecured loans, may adversely affect our cash flows. For further details of unsecured loans of our Company and its subsidiary company, please refer the chapter titled “*Financial Statements as Restated*” beginning on page 159 of this Draft Red Herring Prospectus.

37. *Our future funds requirements, in the form of issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

38. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders’ investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” on page 158 of this Draft Red Herring Prospectus.

39. *We have issued Equity Shares in the last twelve months, the price of which is lower than the Issue Price.*

We have issued equity shares in the last twelve months at a price which is lower than the Issue Price. Details of such issuance is given in the table below:

Date of Allotment	No. of Equity Shares	Face Value (In Rs.)	Issue Price (In Rs.)	Nature of Allotment

The issue is above the Issue Price, which has been discovered through fixed price process and finalized by our Company in consultation with the Book Running Lead Manager. For further details of Equity Shares issued, please refer to chapter titled, ‘*Capital Structure*’ beginning on page 52 of this Draft Red Herring Prospectus.

40. *Industry information included in this Draft Red Herring Prospectus has been derived from industry reports. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

We have relied on the reports of certain independent third parties for purposes of inclusion of such information in this Draft Red Herring Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed, and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us, or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to

Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Draft Red Herring Prospectus.

41. *The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for Equity Shares will develop, or if developed, the liquidity of such market for Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

42. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue Price of our Equity Shares has been determined by book built method. This price is based on numerous factors (For further information, please refer chapter titled “Basis for Issue Price” beginning on page 93 of this Draft Red Herring Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and Domestic and international economic, legal and regulatory factors unrelated to our performance.

43. *The sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

EXTERNAL RISK FACTORS

44. *The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.*

Since first being reported in December 2019, the outbreak of COVID-19 has spread globally. The World Health Organization declared the outbreak of COVID-19 to be a public health emergency of international concern on January 30, 2020, and a global pandemic on March 11, 2020.

The COVID-19 pandemic has had, and any future pandemic or widespread public health emergency could have, repercussions across regional and global economies and financial markets. The outbreak of COVID-19 in many countries, including India has significantly and adversely impacted economic activity and has contributed to significant volatility and negative pressure in financial markets, and it is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, recession or depression, despite monetary and fiscal interventions by governments and central banks globally.

The global impact of the outbreak has been rapidly evolving. As cases of COVID-19 have continued to be identified in additional countries, many jurisdictions, including the governments of India, have reacted by instituting restrictive measures including invoking lock downs and quarantines, requiring the closure of non-essential businesses and placing restrictions on the types of businesses that may continue to operate, mandating restrictions on travel, implementing “shelter-in-place” rules and “stay-at-home” orders, and enforcing remote working regulations. No prediction can be made of when any of the restrictions currently in place will be relaxed or expire, or whether or when further restrictions will be announced. Although some governments are beginning to ease or lift these restrictions, the impacts from the severe disruptions caused by the effective shutdown of large segments of the global economy or localized lockdowns remain unknown.

On March 24, 2020, the Government of India ordered a national lockdown in response to the spread of COVID-19. Our business was determined to be operating in an essential industry, which allowed us to continue our operations after the introduction of the lockdown in India, subject to certain adjustments in working patterns.

There can be no assurance that there will not be any material impact on our operations if the outbreak of COVID-19 is not effectively controlled. Although some restrictions have been eased, it is not yet clear when the lockdown conditions will be fully lifted in India. Further, although we were declared an essential business and were able to adjust our business to continue operating during the lockdown, there can be no assurance that further restrictions will not be introduced or that we will continue to retain such essential status. Further, we may be required to quarantine employees that are suspected of being infected of COVID-19, as well as others that have come into contact with those employees or shut down our manufacturing facilities as a health measure, which could have an adverse effect on our business operations or result in a delay in the production and supply of products to our customers in a timely manner. If any of our suppliers are affected by COVID-19 to the extent our supply chain is disrupted, this may affect our ability to meet the demand of our customers.

The full extent to which the COVID-19 pandemic, or any future pandemic or widespread public health emergency impacts our business, operations and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including the scope, severity, and duration of the pandemic; actions taken by governments, business and individuals in response to the pandemic; the effect on customer demand for and ability to pay for our products; the disruptions or restrictions on our employees’ and suppliers’ ability to work and travel; volatility in foreign exchange rates; any extended period of remote work arrangements; and strain on our or our customers’ business continuity plans, and resultant operational risk.

The COVID-19 pandemic, or any future pandemic or widespread public health emergency could therefore materially and adversely impact our business, financial condition, cash flows and results of operations.

45. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Book Running Lead Manager has appointed [●] as Designated Market Maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India’s fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

46. *You will not be able to sell immediately on Indian Stock Exchanges any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.*

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading on stock exchange. We cannot assure you that the Equity Shares will be credited to investor’s demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Draft Red Herring Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, if the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

47. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the Emerge Platform of National Stock Exchange of India Limited in a timely manner, or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure

or delay in listing the Equity Shares on the Emerge Platform of National Stock Exchange of India Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

48. *We are subject to risks arising from interest rate fluctuations, which could adversely impact our business, financial condition and operating results.*

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for future borrowings increase significantly, our cost of servicing such debt will increase. This may negatively impact our results of operations, planned capital expenditures and cash flows.

49. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Further, with the Introduction of the Goods and Services Act, tax rates and its implication may have material impact on our products. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

50. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

51. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

52. *Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.*

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

53. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks in India, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

For further details on the method and procedure for Bidding, please see section entitled “Offer Procedure” on page 206 of this Draft Red Herring Prospectus.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Offer Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

GLOBAL OUTLOOK

The global economy remains in a precarious state amid the protracted effects of the overlapping negative shocks of the pandemic, the Russian Federation’s invasion of Ukraine, and the sharp tightening of monetary policy to contain high inflation. Global financial conditions have tightened as a result of policy rate hikes and, to a lesser extent, recent bouts of financial instability.

Figure 1.1.A. Contributions to global growth

Energy prices have eased considerably since their peak in 2022 on account of weaker global growth prospects and a warmer-than-expected Northern winter, which reduced natural gas and electricity consumption. Metal prices increased in early 2023, reflecting signs of a stronger-than anticipated recovery in China, but subsequently retraced those gains. Pressures on global supply chains have abated as goods demand has weakened and global shipping conditions have improved. Energy prices have eased considerably since their peak in the third quarter of 2022. A warmer-than expected northern hemisphere winter reduced natural gas and electricity consumption, especially in Europe. Energy prices could be lower if global demand is weaker than expected. In this respect, prospects in China play a particularly important role, as it is expected to account for more than half of the increase in global oil demand in 2023. On the upside, risks to the price forecast relate to a lack of expansion in U.S. oil production, low levels of spare capacity among OPEC members, and to the possibility that the cartel may decide to cut output further.

In a scenario where banking stress results in a severe credit crunch and broader financial stress in advanced economies, global growth in 2024 would only be 1.3 percent, about half the pace in the baseline forecast (figure 1.2.A). In another scenario where financial stress propagates globally to a far greater degree, the world economy would fall into recession in 2024, as global growth of only 0.3 percent would imply a contraction in global per capita GDP. Another risk to the forecast pertains to the possibility of higher-than-expected global inflation. This would result in additional monetary policy tightening, which could trigger financial stress. This would be particularly important in the case of the United States, given the scale of international spillovers from hawkish policy reaction by the Federal Reserve to rein in inflation—such spillovers could include a substantial further rise in borrowing costs in EMDEs, especially in those with underlying vulnerabilities (figure 1.2.B). In the longer term, the decades-long slowdown of the fundamental drivers of potential growth— labor supply, capital accumulation, and total factor productivity—may be exacerbated by trade fragmentation and climate-related natural disasters.

In some advanced economies, particularly the euro area, market-derived measures of long-term inflation compensation have moved up since last year, despite a decline in oil prices, with which they have been correlated in the past (figure 1.5.C; Elliot et al. 2015). This could signal greater risks of inflation remaining above target, but may also reflect increased inflation risk aversion among market participants (Böninghausen, Kidd, and de Vincent Humphreys 2018; Lane 2023). Consumer surveys indicate that medium-term inflation expectations in the United States and the euro area have been fairly stable in 2023. Global inflation is projected to gradually edge down as growth decelerates, labor demand in many economies softens, and commodity prices remain stable. The slow pace of improvement means that core inflation is expected to remain above central bank targets in many countries throughout 2024. Risks to the outlook remain tilted to the downside. Recent advanced-economy bank turmoil highlights the possibility of more disorderly failures, which could lead to systemic banking crises and protracted economic downturns, with spillovers to sovereigns and across borders. These failures could be triggered by mounting concerns about

balance sheet quality, continued losses in the heavily leveraged commercial real estate sector, or by the ongoing decline in house prices in many countries.

Metal prices are expected to decline in 2023 and 2024, albeit to levels higher than their 2015-19 average. Price declines reflect a recovery of supply following production disruptions last year, as well as subdued global demand. Metal prices may be higher if China's real estate sector recovers faster than expected or if supply disruptions persist—the importance of developments in China is illustrated by the fact that the country has accounted for a substantial proportion of global demand growth in recent months. Inflation remains above target in almost all inflation-targeting economies. Median headline global inflation stood at 7.2 percent year-on-year in April, down from a peak of 9.4 percent in July 2022. Moderating energy prices help explain global inflation being somewhat softer in the first quarter of 2023 than previously anticipated. However, recent core inflation measures suggest the disinflation that started last year has made only halting progress. Across EMDEs, three-month median core inflation has decelerated somewhat in recent months, while it has picked up in advanced economies. Global financial conditions have become restrictive as a result of the fastest global monetary policy tightening cycle since the 1980s, along with bouts of financial instability.

Figure: Metals demand growth

With supply chain pressures easing and energy prices declining, excess demand appears to be a key driver of continuing high inflation in advanced economies, though lingering impairments to supply capacity may also still play a role.

Advanced-economy banks started the year with unrealized losses on bond portfolios, which increased as interest rates rose. This, combined with shortcomings in risk management, contributed to the failure of several regional banks in the United States. In Europe, Credit Suisse came under intense market pressure in March and was subject to an emergency takeover. The initial emergence of banking stress drove a surge in market volatility, including the sharpest five-day drop in two-year U.S. yields in more than two decades and a large decline in bank equity prices. Central banks have nonetheless reaffirmed intentions to maintain, or increase, the tightness of monetary policy until inflation shows a clear trend toward target. Even with continued signs of banking stress, broader risk appetite in advanced-economy financial markets has been notably resilient. High-yield corporate risk spreads have mostly stayed below their post-2010 average, despite bank lending standards reaching their most restrictive levels since the global financial crisis.

Growth in advanced economies in late 2022 and early 2023 slowed less than expected, as tight labor markets supported robust wage growth and prevented a sharper slowdown in consumption. EMDE growth firmed somewhat in early 2023. External demand for many countries was supported by the pickup in growth in China and the unexpected resilience in advanced economies. Indicators of EMDE domestic demand have improved, but from a low level. Services activity also picked up to start the year, with services PMIs indicating solid expansion in several large EMDEs. Although measures of EMDE financial stress have generally declined since last year, financing costs remain elevated, reflecting both domestic and advanced-economy monetary policy tightening. Activity in EMDE energy exporters remains firm, despite a decline in energy prices (especially for coal and gas), reflecting momentum from a prolonged period of elevated export earnings. In the context of decelerating advanced-economy demand, subdued metal prices will provide little support for growth in EMDE metal exporters, many of which are also facing headwinds from tight financing conditions. In large agricultural exporters, stable high prices have supported investment in machinery and equipment, softening the contractionary impact of increased borrowing costs. Among poorer agricultural exporters, however, prohibitive fertilizer costs are crimping output. Among EMDE commodity importers, the decline in energy import costs has partially reversed the squeeze on consumers and industrial activity from last year's worsening terms of trade.

Growth in EMDEs is projected to edge up to 4 percent in 2023, which almost entirely reflects the rebound in China. EMDE growth is expected to receive little support from external demand. China's recovery is envisaged to be services oriented, rather than trade-intensive. Many EMDE central banks have also continued to tighten monetary policies, or retained high rates for longer than previously expected. Given lags in the transmission of monetary tightening, investment growth is expected to be weak throughout the year, with labour markets and consumption also softening. Moreover, market pricing suggests that inflation-adjusted policy rates will rise further in many EMDEs, as inflation declines only gradually, taking aggregate EMDE

real rates further into positive territory (figure 1.9.C). This should help to combat inflation in many countries but will entail a continued drag on EMDE activity throughout 2024.

In 2022, South Asia (SAR) endured significant negative spillovers from rapid monetary policy tightening in advanced economies, weak growth in China, and the Russian Federation’s invasion of Ukraine. Import restrictions imposed by several economies (Bangladesh, Nepal, Pakistan, Sri Lanka), which adversely affected economic activity, have been relaxed as external imbalances have improved and exchange rate pressures have eased. Food export bans, however, are expected to remain in place in Bangladesh, India, and Pakistan through 2023 despite falling global prices.

In India, which accounts for three-quarters of output in the region, growth in early 2023 remained below what it achieved in the decade before the pandemic as higher prices and rising borrowing costs weighed on private consumption. However, manufacturing rebounded into 2023 after contracting in the second half of 2022, and investment growth remained buoyant as the government ramped up capital expenditure. Private investment was also likely boosted by increasing corporate profits. Unemployment declined to 6.8 percent in the first quarter of 2023, the lowest since the onset of the COVID-19 pandemic, and labour force participation increased. India’s headline consumer price inflation has returned to within the central bank’s 2-6 percent tolerance band.

Growth in India is expected to slow further to 6.3 percent in FY2023/24 (April-March), a 0.3 percentage point downward revision from January. This slowdown is attributed to private consumption being constrained by high inflation and rising borrowing costs, while government consumption is impacted by fiscal consolidation. Growth is projected to pick up slightly through FY2025/26 as inflation moves back toward the midpoint of the tolerance range and reforms payoff. India will remain the fastest-growing economy (in terms of both aggregate and per capita GDP) of the largest EMDEs.

In SAR excluding India, growth is expected to slow to 2.9 percent in 2023 before rebounding to 4.3 percent in 2024.

(Figure: Manufacturing and tourism activity)

Growth in the region is expected to slow marginally to 5.9 percent in 2023 and more significantly to 5.1 percent in 2024 (figure 2.5.2.A). Relative to January projections, this is a 0.4 percentage point upward revision in 2023 and a 0.7 percentage point downward revision for 2024. Greater-than expected resilience in private consumption and investment, and a robust services sector in India, is supporting growth in 2023.

Expected inflation one year ahead has risen sharply in the region since early 2022 in response to broad-based price increases. Additionally, in several economies, economic crises have further contributed to this inflationary pressure. Medium-term inflation expectations appear thus far to have remained subdued; however, if higher inflation expectations became entrenched, additional monetary policy tightening would be required and could affect financial stability as well as economic activity in the region. Financial sector risks remain elevated in several economies, with high levels of non-performing loans, weak capital buffers, and weak bank governance.

Growth in India is expected to slow further to 6.3 percent in FY2023/24 (April-March), a 0.3 percentage point downward revision from January. This slowdown is attributed to private consumption being constrained by high inflation and rising borrowing costs, while government consumption is impacted by fiscal consolidation. Growth is projected to pick up slightly through FY2025/26 as inflation moves back toward the midpoint of the tolerance range and reforms payoff. India will remain the fastest-growing economy (in terms of both aggregate and per capita GDP) of the largest EMDEs.

INDIAN ECONOMY:

Global economic recovery was well on track until the Russia-Ukraine conflict broke out in February 2022. The conflict has now continued for almost a year, disrupting the restoration of the supply chains disrupted earlier by lockdowns and limited

trade traffic. In the last eleven months, the world economy has faced almost as many disruptions as caused by the pandemic in two years. The conflict caused the prices of critical commodities such as crude oil, natural gas, fertilisers, and wheat to soar. This strengthened the inflationary pressures that the global economic recovery had triggered, backed by massive fiscal stimuli and ultra-accommodative monetary policies undertaken to limit the output contraction in 2020. Inflation in Advanced Economies (AEs), which accounted for most of the global fiscal expansion and monetary easing, breached historical highs. Rising commodity prices also led to higher inflation in the Emerging Market Economies (EMEs), which otherwise were in the lower inflation zone by virtue of their governments undertaking a calibrated fiscal stimulus to address output contraction in 2020.

India's Economic Resilience and Growth Drivers

Monetary tightening by the RBI, the widening of the CAD, and the plateauing growth of exports have essentially been the outcome of geopolitical strife in Europe. As these developments posed downside risks to the growth of the Indian economy in FY23, many agencies worldwide have been revising their growth forecast of the Indian economy downwards. These forecasts, including the advance estimates released by the NSO, now broadly lie in the range of 6.5-7.0 per cent. Despite the downward revision, the growth estimate for FY23 is higher than for almost all major economies and even slightly above the average growth of the Indian economy in the decade leading up to the pandemic. IMF estimates India to be one of the top two fast-growing significant economies in 2022. Despite strong global headwinds and tighter domestic monetary policy, if India is still expected to grow between 6.5 and 7.0 per cent, and that too without the advantage of a base effect, it is a reflection of India's underlying economic resilience; of its ability to recoup, renew and re-energise the growth drivers of the economy.

Figure I.17: India growth projections by various agencies for FY23

India’s economic resilience can be seen in the domestic stimulus to growth seamlessly replacing the external stimuli. Although domestic consumption rebounded in many economies, the rebound in India was impressive for its scale. It contributed to a rise in domestic capacity utilisation. Domestic private consumption remains buoyant in November 2022, as indicated by Motilal Oswal’s Economic Activity Index.

Figure I.18: Enhanced capacity utilisation and business sentiments

Note: BEI – Business Expectations Index

The rebound in consumption has also been supported by the release of “pent-up” demand, a phenomenon not again unique to India but nonetheless exhibiting a local phenomenon influenced by a rise in the share of consumption in disposable income. Since the share of consumption in disposable income is high in India, a pandemic-induced suppression of consumption built up that much greater recoil force. Hence, the consumption rebound may have lasting power. Accelerating growth in personal loans in India testifies to an enduring release of “pent-up” demand for consumption

The “release of pent-up demand” was reflected in the housing market too. Demand for housing loans picked up. Consequently, housing inventories have declined, prices are firming up, and construction of new dwellings is picking up pace. This has stimulated innumerable backward and forward linkages that the construction sector is known to carry. The universalisation of vaccination coverage also has a significant role in lifting the housing market as, in its absence, the migrant workforce could not have returned to construct new dwellings.

Apart from housing, construction activity, in general, has significantly risen in FY23 as the much-enlarged capital budget (Capex) of the central government and its public sector enterprises is rapidly being deployed. Going by the Capex multiplier estimated for the country, the economic output of the country is set to increase by at least four times the amount of Capex. 4,5 States, in aggregate, are also performing well with their Capex plans. Like the central government, states also have a larger capital budget supported by the centre’s grant-in-aid for capital works and an interest-free loan repayable over 50 years.

GROWTH DRIVERS OF INDIAN AGRICULTURE

1. Demand-side drivers

- Rapid population expansion in India is the main factor driving the industry.
- Changing lifestyle and food habits due to increased disposable income.
- The demand for processed foods in India is constrained by low income and socio-cultural factors.

2. Supply-side drivers

- According to the Center for Environment and Agriculture (CENTEGRO) and Crop Care Federation of India (CCFI), India can become the 'global agricultural hub' for other countries, which have harsh weather, scarce labour and lands, and are seeking to outsource their agriculture.
- High level of agricultural production - large livestock base, wide variety of crops, inland water bodies and a long coastline, help increase marine production.
- Bringing Green Revolution to Eastern India (BGREI).

3. Policy Support

- A new sub-scheme of PM Matsya Sampada Yojana with targeted investment of Rs. 6,000 crore (US\$ 729 million) to be launched to further enable activities of fishermen, fish vendors, and micro & small enterprises, improve value chain efficiencies, and expand the market.
- Online, Competitive, Transparent Bidding System with 1.74 crore farmers and 2.39 lakh traders put in place under the National Agriculture Market (e- NAM) Scheme.

OPPORTUNITIES

1. Supply Chain Infrastructure

- Technology-driven, integrated supply chains enable entities to reduce inventory and costs, add product value, extend resources, accelerate time to market, expand market, increase pricing for sellers and variety for buyers as well as retain customers.
- In order to have a successful supply chain, the Indian Government has sought to involve multiple stakeholders to improve interactions between farmers, processors, distributors and retailers.
- The nation's processed food industry is expected to grow to US\$ 958 billion by 2025 at a compound annual growth rate (CAGR) of 12%. The government's focus is on supply chain-related infrastructures like cold storage, abattoirs and food parks.

2. Potential Global Outsourcing Hubs

- Huge opportunity exists for agri input segments like seeds and plant growth nutrients.
- According to the Center for Environment and Agriculture (CENTEGRO) and Crop Care Federation of India (CCFI), India can become the 'global agricultural hub' for other countries, which have harsh weather, scarce labour and lands, and are seeking to outsource their agriculture.

3. Farm Management Services

- Given the importance of agriculture in India, both the government and private players are working to improve the efficiency and productivity of Indian agriculture and exploring how Farming as a Service (FaaS) solutions can play a role.
- FaaS seeks to provide affordable technology solutions for efficient farming. It converts fixed costs into variable costs for farmers, thus making the techniques more affordable for a majority of small farmers. Its services are available on a subscription or pay-per-use basis in three broad categories, which are crucial across the agriculture value chain.

GOVERNMENT INITIATIVES THAT WILL FURTHER PROP UP THE AGRICULTURAL SECTOR

- Rs. 1.24 lakh crore (US\$ 15.9 billion) has been allocated to Department of Agriculture, Cooperation and Farmers' Welfare.
- The Indian government is planning to increase the number of primary agriculture cooperatives from 60,000 to 3 lakh until 2026.
- The Agriculture Ministry would offer agricultural institutes with a grant of up to Rs. 10 lakh (US\$ 13,175) for the procurement of drones.
- The Agricultural Technology Management Agency (ATMA) Scheme has been implemented in 704 districts across 28 states and 5 UTs to educate farmers. Grants-in-aid are released to the State Government under the scheme with the goal of supporting State Governments' efforts to make available the latest agricultural technologies and good agricultural practices in various thematic areas of agriculture and allied sector.
- As per the Economic Survey 2022-23, US\$ 1.66 billion (Rs. 13,681 crore) sanctioned for Post-Harvest Support and Community Farms under the Agriculture Infrastructure Fund.

<u>CASTORDE-OILCAKE</u>																									
	<p>Castor De-Oil Cake is produced by crushing castor seeds in expeller to extract oil from it in a control temperature with help of steam. The residue of expeller process is further processed in solvent extraction plant to remove oil from it. Castor De-Oil Cake is an excellent fertilizer because of high content of Nitrogen,Phosphoric Acid, Potash and moisture retention and it is also the prominent organic fertilizer can be used to as alternatives to chemical fertilizer. It is simple manure, which acts progressively that encourages soil microbial activity.</p>																								
<u>HIGHPROTEINCASTORDE-OILEDCAKE</u>																									
	<p>High Protein Castor De Oiled Cake is an organic manure which enhances the fertility of the soil without causing any damage or decay. It is enriched with the three big elements vital and conducive to the proper growth of crops - Nitrogen, Phosphorus and Potassium. It also has traces of nutrients like Manganese, Zincand Copper, thus making it a balanced fertilizer. It has high nutritional value and rich in proteins.</p>																								

Extraction of Oil:

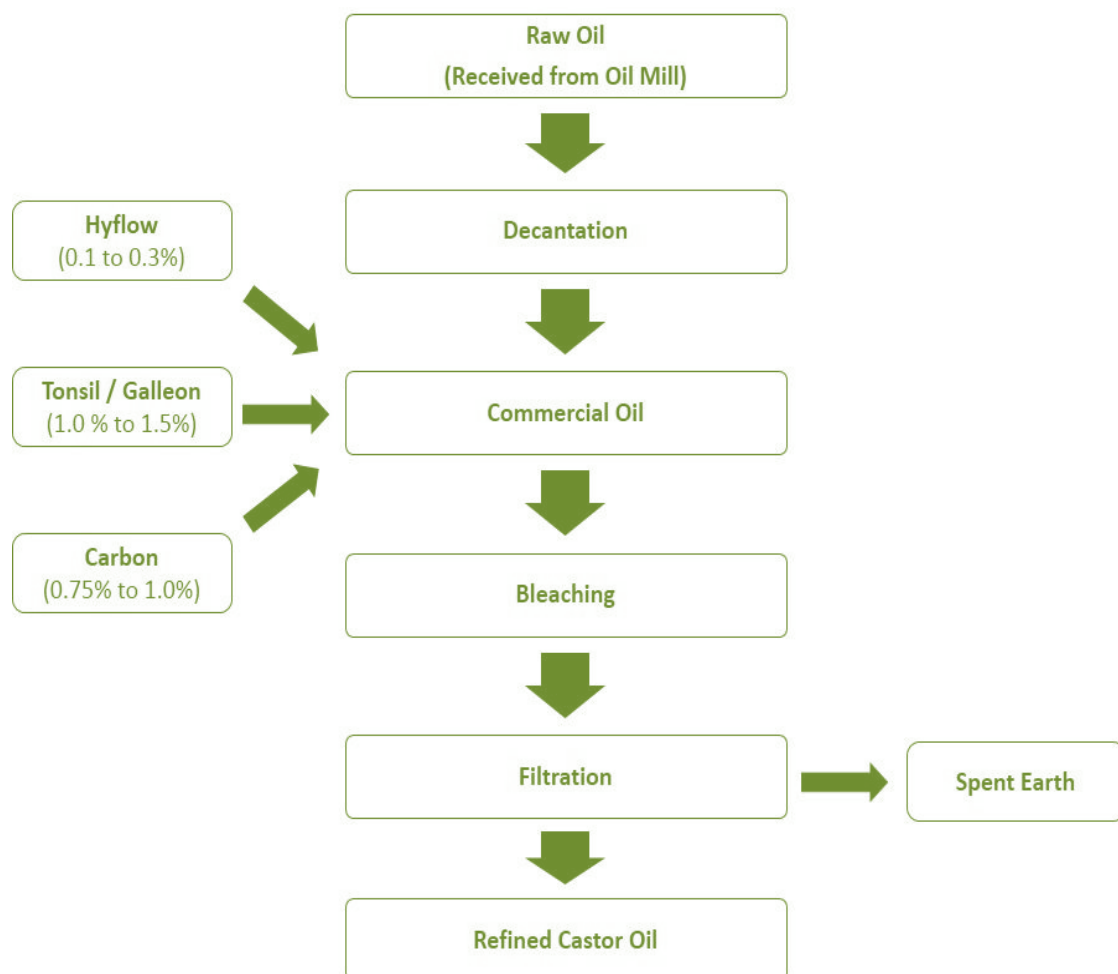

The oil is extracted from the Castor Seeds through two different process as follows:

- a. **Pressing:** The castor seeds are fed into a series of expellers consisting of heavy screws working in strong cages. In this process, the seeds are warmed in a steam-jacketed press to remove moisture, and this hardening process will aid in extraction. The cooked seeds are then dried before the extraction process begins. A continuous screw is used to crush the castor oil seeds to facilitate removal of the oil. The machine used in this process is called expeller.
- b. **Solvent Extraction:** The process in brief constitutes treating the pressed castor seeds cake with solvent hexane resulting in a solution of solvent and oil. The said solution is further subjected to distillation and stripping to separate the oil and the solvent. The extracted meal containing solvent is made free from its solvent contents by a process called desolventisation and the solvent in vapor form from distillation, oil stripping and meal desolventisation is condensed in condensers, collected and reused for further process.

Refining of Oil:

Following extraction of the oil through the use of a press, there still remain impurities in the extracted oil. To aid in the removal of the remaining impurities, filtration systems are usually deployed. The filtration systems are able to remove large and small size particulates, any dissolved gases, acids, and even water from the oil. The filtration system equipment normally used for this task is the filter press. Such purified oil is called Castor Crude Oil. The Castor Crude Oil is then refined by “Decantation”, “Bleaching” and “Filtering”

PROCESS FLOWCHART FOR PRODUCTION OF REFINING OF CASTOR OIL:

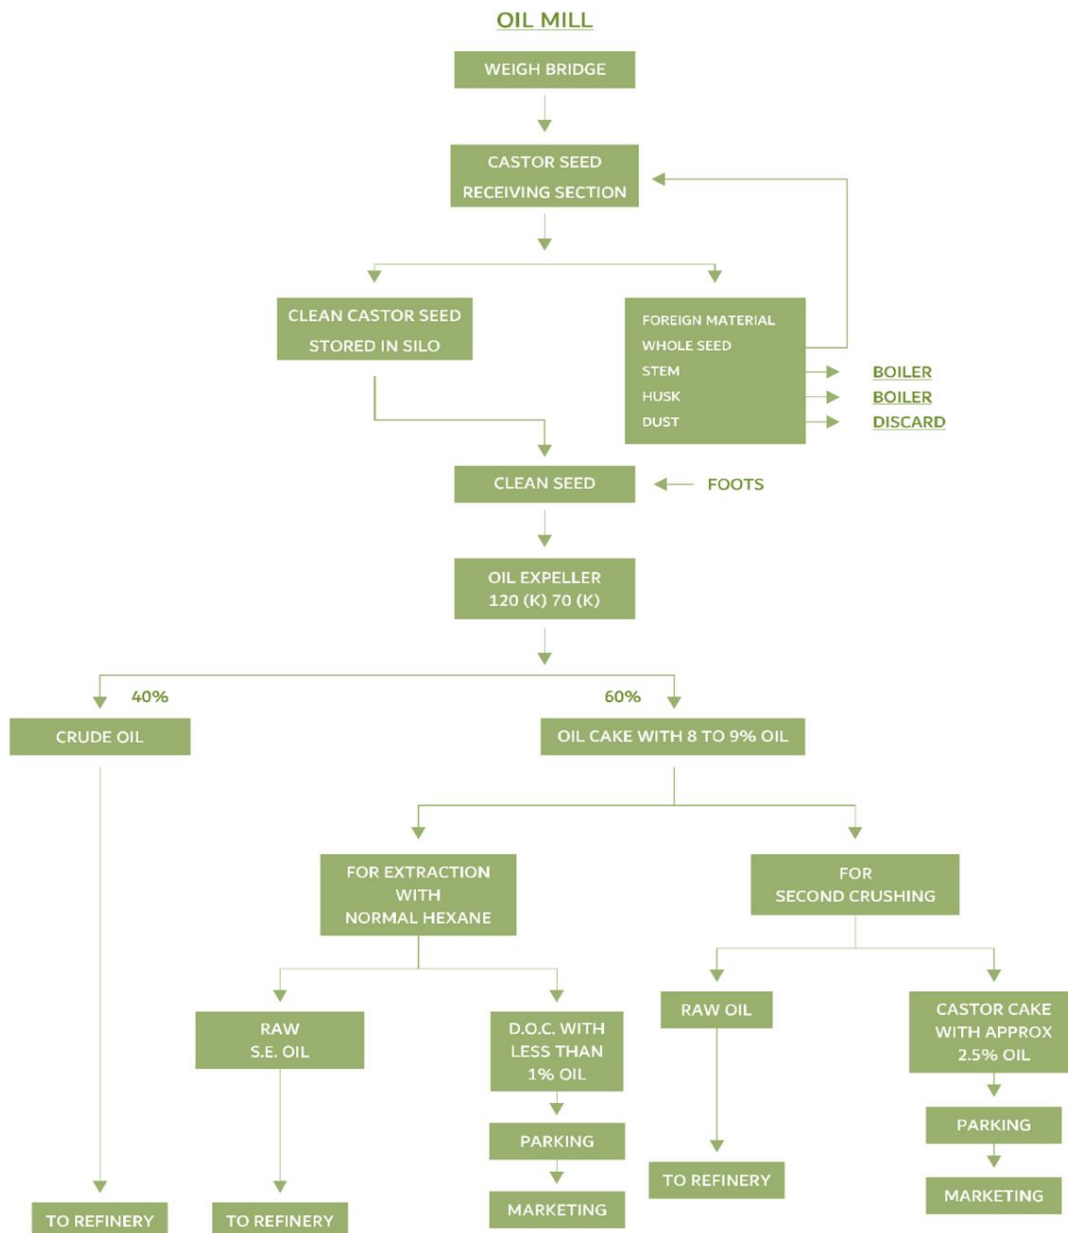

The first step in the castor oil refining process, called decantation, which is used to reduce the phosphatides and the metal content of the crude oil. Depending upon the quality of Commercial Oil and Final Product required, dosage of Tonsil, Carbon and Hyflow is provided to the raw oil. The resulting product after such dosages is called Commercial Oil.

Castor Oil is used for many applications where the final product's appearance is extremely important. Hence an adsorption process called "bleaching" can be used to remove unrequired colour pigments and remaining phospholipids, using activated earths under moderate vacuum conditions.

Upon completion of Bleaching process, the bleached solution is sent for filtration where the purified Castor oil is separated from the residues of the bleaching process called "Spent Earth". The Spent Earth is a waste produce and the same is discarded from the manufacturing unit.

The purified castor oil after filtration is called "Refined Castor Oil". The said oil is stored in the tank and depending upon the orders received, the same is dispatched to the client through trucks.

PROCESS OF PRODUCTION OF CASTOR FILTER OIL AND DE-OILED CAKE:

The Castor seeds are first fed into a series of expellers consisting of heavy screws working in strong cages. They are first cooked in steam-jacketed press and then the cooked castor seeds are squeezed with high pressure. In this pressure, the oil is squeezed out through the slits in the cage. Such squeezed oil is called crude oil. The seeds which are pressed into cakes are called oil cakes. Such Oil Cakes contain about 7% to 8 % oil. Oil Cakes are discharged through the cage from the Expeller.

The oil cake is further sent to solvent extraction plant. The oil cake is fed into extractor where it is treated with low boiling petroleum solvent called normal hexane. The hexane dissolves the oil from the cake forming a solution and the oil content of cake is reduced. The solution of oil in hexane is distilled in specially designed distillation equipment under vacuum to evaporate the solvent from the oil. The oil thus separated is stored in the tank and then sent for refining.

The crude oil extracted out of the press is then sent for filtering where the impurities like castor seeds residues are removed from the crude oil. Such extracted castor oil residues are called honey. This honey contains oil upto 45%. Such retrieved honey is mixed with new bulk of the seeds to be loaded in the expeller for further process.

Castor seeds cakes are the solid matter that remains once oil has been extracted and pressed from Castor seeds by using “Oil Expellers Machines”, these “De-oil cake”, are widely used in the industry for feeding cattle or as fertilizers. The left out residual oil cake in the expeller is further completely recovered through solvent extraction process. The De-oiled Cake is further packed and sold in the market.

Additionally, the projects undertaken by us require, at various stages, the sanction of the concerned authorities under the relevant central and state legislations and local byelaws.

Following is an overview of some of the important laws and regulations, which are relevant to our business.

LAWS IN RELATION TO OUR BUSINESS

The Food Safety and Standards Act, 2006 (“FSSA”) and the regulations framed thereunder

The FSSA was enacted on August 23, 2006 repealing and replacing the Prevention of Food Adulteration Act, 1954. The FSSA pursues to consolidate the laws relating to food and establish the Food Safety and Standards Authority of India (“FSSAI”) for laying down scientific standards for articles of food and to regulate their manufacture, storage, distribution, sale and import to ensure availability of safe and wholesome food for human consumption, and for matters connected therewith or incidental thereto. The standards prescribed by the FSSAI include specifications for food additives, flavourings, processing aids and materials in contact with food, ingredients, contaminants, pesticide residue, biological hazards and labels. Under the provisions of the FSSA, no person may carry on any food business except under a license granted by the FSSAI. The FSSA sets forth the requirements for licensing and registering food businesses in addition to laying down the general principles for safety, responsibilities and liabilities of food business operators.

In exercise of powers under the FSSA, the FSSAI has also framed the Food Safety and Standards Rules, 2011 (“FSSR”). The FSSR sets out the enforcement structure of ‘commissioner of food safety’, ‘the food safety officer’ and ‘the food analyst’ and procedures of taking extracts, seizure, sampling and analysis. The FSSA also lays down penalties for various offences, including recall procedures. The Food Safety and Standards (Licensing and Registration of Food Businesses) Regulations, 2011 provides for the conditions and procedures for registration and licensing process for food business and lays down general requirements to be fulfilled by various food business operators (“FBOs”), including petty FBOs as well as specific requirements to be fulfilled by businesses dealing with certain food products.

Consumer Protection Act, 2019 (“CPA”) and rules framed thereunder

The CPA, which repeals the Consumer Protection Act, 1986, was enacted to provide simpler and quicker access to redress consumer grievances. It seeks to protect and promote the interests of consumers against deficiencies and defects in goods or services and secure the rights of a consumer against unfair trade practices, which may be practiced by manufacturers, service providers and traders. Further, the definition of “consumer” has been expanded under the CPA to include persons engaged in online and offline transactions through electronic means or by tele-shopping, or direct-selling or multi-level marketing.

The basic purpose of these statutes is to control, abate and prevent pollution. In order to achieve these objectives, Pollution Control Boards ("PCB") which are vested with diverse powers to deal with water and air pollution, have been set up in each state. The PCBs are responsible for setting the standards for maintenance of clean air and water, directing the installation of pollution control devices in industries and undertaking investigations to ensure that industries are functioning in compliance with the standards prescribed. These authorities also have the power of search, seizure, and investigation if the authorities are aware of or suspect pollution. In addition, the Ministry of Environment and Forests looks into Environment Impact Assessment. The Ministry receives proposals for expansion, modernization and setting up of projects and the impact which such projects would have on the environment is assessed by the Ministry before granting clearances for the proposed projects.

Environment (Protection) Act, 1986 as amended (“EPA”)

EPA provides for the prevention, control and abatement of pollution. All the assets and liabilities have been classified as current or non-current as per Company’s operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013 Based on the nature of products and the time between acquisition of assets for processing and their realization in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months for the purpose of current and non-current classification of assets and liabilities.

Functional and Presentation Currency

The Financial Statements have been presented in Indian Rupees (INR), which is the Company's functional currency. All financial information presented in INR has been rounded off to the nearest two decimals of Lakhs, unless otherwise stated.

2.3 Use of Estimates, Assumptions and Judgements

The preparation of the Company's financial statements requires management to make certain estimates and assumptions that affect the reported amounts of revenue, expenses, assets, liabilities and the accompanying disclosure, and the disclosure of contingent liabilities. Such judgments, estimates and associated assumptions are evaluated based on historical experience and various other factors, including estimation of the effects of uncertain future events, which are believed to be reasonable under the circumstances. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment of the carrying amount of assets or liabilities affected in future. The management believes that the estimates used in preparation of the financial statements are prudent and reasonable.

Estimates and assumptions:

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

a) Fair Value Measurement of Financial Instruments

In estimating the fair value of financial assets and financial liabilities, the Company uses market observable data to the extent available. Where such Level-I inputs are not available, the Company establishes appropriate valuation techniques and inputs to the Model. The inputs to these models are taken from observable market where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as Liquidity Risk, Credit Risk and Volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

b) Income Taxes

The Company's tax jurisdiction is India. Significant judgments are involved in estimating budgeted profits for the purpose of paying advance tax, determining the provision for income taxes, including amount expected to be paid/recovered for uncertain tax positions. Significant management judgment is also required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and the level of future taxable profits together with future tax planning strategies, including estimates of temporary differences reversing on account of available benefits under respective country taxation laws.

c) Impairment of Non-Financial Assets

At the end of each reporting period, the Company reviews the carrying amounts of non-financial assets, other than inventories and deferred tax assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. Each Cash

Generating Unit (CGU) represents the smallest group of assets that generates cash inflows that are largely independent of the cash inflows of other assets or CGUs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or CGU) is reduced to its recoverable amount. An impairment loss is recognized immediately in statement of profit and loss. Impairment loss recognized in respect of a CGU is allocated to reduce the carrying amounts of the other assets of the CGU (or group of CGUs) on a pro rata basis.

Assets (other than goodwill) for which impairment loss has been recognized in prior periods, the Company reviews at each reporting date whether there is any indication that the loss has decreased or no longer exists. When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in statement of profit and loss.

d) Useful Life of Property, Plant and Equipment

Determination of the estimated useful life of property, plant and equipment and intangible assets and the assessment as to which components of the cost may be capitalized. Useful life of these assets is based on the life prescribed in

Schedule II to the Companies Act, 2013 or based on technical estimates, taking into account the Company's historical experience with similar assets, nature of the asset, estimated usage, expected residual values and operatin

g conditions of the asset. Management reviews its estimate of the useful lives of depreciable/ amortizable assets at each reporting date, based on the expected utility of the assets. The depreciation / amortization for future periods is revised if there are significant changes from previous estimates.

e) Determination of lease term & discount rate

Ind AS 116 Leases requires lessee to determine the lease term as the non-cancellable period of a lease adjusted with any option to extend or terminate the lease, if the use of such option is reasonably certain. The Company makes assessment on the expected lease term on lease-by-lease basis and thereby assesses whether it is reasonably certain that any options to extend or terminate the contract will be exercised. In evaluating the lease term, the Company considers factors such as any significant leasehold improvements undertaken over the lease term, costs relating to the termination of lease and the importance of the underlying to the Company's operations taking into account the location of the underlying asset and the availability of the suitable alternatives. The lease term in future periods is reassessed to ensure that the lease term reflects the current economic circumstances.

The discount rate is generally based on the **incremental borrowing rate** specific to the lease being evaluated or for a portfolio of leases with similar characteristics.

f) Recognition and measurement of Contingent liabilities, provisions and uncertain tax positions

There are various legal, direct and indirect tax matters and other obligations including local and state levies, availing input tax credits etc., which may impact the Company. Evaluation of uncertain liabilities and contingent liabilities arising out of above matters and recognition and measurement of other provisions are based on the assessment of the probability

of an outflow of resources, and on past experience and circumstances known at the balance sheet date. The actual outflow of resources at a future date may therefore vary from the figure included in other provisions.

g) Revenue from contracts with customers

The Company applied the following judgements that significantly affect the determination of the amount and timing of revenue from contracts with customers.

h) Inventory Measurement

The measurement of inventory in bulk / loose form lying in Kgs / litres is complex and involves significant judgment and estimate. The Company performs physical counts of above inventory on a periodic basis using internal / external experts to perform volumetric surveys and assessments, basis which the estimate of quantity for these inventories is determined. The variations, if any noted between book records and physical quantities of above inventories are evaluated and appropriately accounted in the books of accounts.

i) Provision for Decommissioning / Dismantling Liabilities

The Management of the Company has estimated that there is no probable decommissioning / dismantling liability under the conditions / terms of the lease agreements.

j) Impairment of trade receivables

As per Ind AS 109 impairment allowance has been determined based on Expected Credit Loss Method. The Company uses a simplified approach to determine impairment loss allowance on the portfolio of trade receivables. This is based on its historically observed default rates over the expected life of the trade receivable and is adjusted for forward looking estimates. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed. The assessment of the correlation between historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and of forecast economic conditions. The company's historical credit loss experience and forecast of economic conditions may not be representative of customer's actual default in the future.

k) Effective interest rate

For the requirement of Ind AS 109 and Ind AS 116, company has used incremental borrowing rate as the rate for discounting and amortising. This incremental borrowing rate reflects the rate of interest that the company would have to pay to borrow over a similar term, with a similar security, the funds necessary to obtain an asset of a similar nature and value in a similar economic environment. Determination of the incremental borrowing rate requires estimation.

The company has considered the amendments to Schedule III of the Companies Act 2013 notified by Ministry of Corporate Affairs ("MCA") via notification dated 24 March 2021 in the Ind AS Summary Statements disclosures, wherever applicable.

2.4 Summary of Significant Accounting Policies

a. Property, plant and equipment

(i). Recognition and measurement

Property, plant and equipment are stated at acquisition cost less accumulated depreciation and accumulated impairment losses, if any. All costs, including borrowing costs incurred up to the date the asset is ready for its intended use, is capitalized along with respective asset. Cost of an item of property, plant and equipment comprises its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates, any directly attributable cost of bringing the item to its working condition for its intended use. The cost of a self-constructed item of property, plant and equipment comprises the cost of materials and direct labor, any other costs directly attributable to bringing the item to working condition for its intended use, and estimated costs of dismantling and removing the item and restoring the site on which it is located.

Policy on Replacement Cost accounting

When significant parts of plant and equipment are required to be replaced at regular intervals, the Company depreciates them separately based on their specific useful lives. All other repair and maintenance costs are recognized in profit or loss as incurred.

If significant parts of an item of Property, Plant and Equipment have different useful lives, then they are accounted for as separate items (major components) of property, plant and equipment.

Freehold land is carried at cost.

(ii). Subsequent measurement

Subsequent expenditure related to an item of Property, Plant and Equipment are included in its carrying amount or recognized as a separate asset, as appropriate, only when it is probable that the future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. Subsequent costs are depreciated over the residual life of the respective assets. All other expenses on existing Property, Plant and Equipments, including day-to-day repair and maintenance expenditure and cost of replacing parts, are charged to the Statement of Profit and Loss for the period during which such expenses are incurred.

(iii). Depreciation

Depreciable amount for assets is the cost of an asset, or other amount substituted for cost, less its estimated residual value. Depreciation is recognized so as to write off the cost of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using straight-line method as per the useful life prescribed in Schedule II to the Companies Act, 2013 except in respect of following categories of assets, in whose case the life of the assets has been assessed as under based on technical advice, taking into account the nature of the asset, the estimated usage of the asset, the operating conditions of the asset, past history of replacement, anticipated technological changes, manufacturers warranties and maintenance support, etc.

Assets Category	Estimated Useful Life
Building	20-30 Years
Leasehold Improvements	5 -10 Years
Computers	2-5 Years
Plant & Machinery	5-30 Years
Furniture & Fixtures	5-10 Years
Electrical Installations	10-25 Years
Office Equipment	2-10 Years
Vehicles	5-10 Years

The property, plant and equipment acquired under finance leases is depreciated over the asset's useful life or over the shorter of the asset's useful life and the lease term if there is no reasonable certainty that the Company will obtain ownership at the end of the lease term.

(iv). Derecognition

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in statement of profit and loss.

b. Intangible Assets**(i). Recognition and measurement**

Intangible assets acquired separately are carried at cost less accumulated amortization and any accumulated impairment losses

(ii). Amortization

Amortization is recognized on straight line basis over their estimated useful lives.

(iii). Derecognition

An intangible asset is derecognized on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition are recognized in statement of profit and loss.

c. Capital Work in Progress

Capital work in progress is stated at cost including borrowing costs for qualifying assets if the recognition criteria are met and other direct administrative costs. Expenditure related to and incurred during implementation of capital projects to get the assets ready for intended use is included under "Capital Work in Progress". The same is allocated to the respective items of property plant and equipment on completion of construction/ erection of the capital project/ property plant and equipment.

d. Impairment

At the end of each reporting year, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest company of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in the Statement of Profit and Loss.

e. Inventories

Raw materials and stores, work in progress, traded and finished goods are stated at the lower of cost and net realizable value. Cost of raw materials and traded goods comprises cost of purchases.

Cost of work-in-progress and finished goods comprises direct materials, direct labour and an appropriate proportion of variable and fixed overhead expenditure. Fixed overheads are allocated on the basis of normal operating capacity. Cost of inventories also include all other costs incurred in bringing the inventories to their present location and condition. Cost includes the reclassification from equity of any gains or losses on qualifying cash flow hedges relating to purchases of raw material. Costs are assigned to the individual items in a company of inventories on the basis of weighted average cost basis. Costs of purchased inventory are determined after deducting rebates and discounts. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

Costs of inventories are determined on First in First out (FIFO) basis. Net realizable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale. Cost of inventory comprises all costs of purchase, duties, taxes (other than those subsequently recoverable from tax authorities) and all other costs incurred in bringing the inventory to their present location and condition.

f. Revenue recognition

Sale of goods

Revenue is measured at the fair value of the consideration received or receivable. The Company recognizes revenues on sale of products, net of discounts, sales incentives, rebates granted, returns, sales taxes/GST and duties when the products are delivered to customer or when delivered to a carrier for export sale, which is when title and risk and rewards of ownership pass to the customer. Export incentives are recognized as income as per the terms of the scheme in respect of the exports made and included as part of export turnover. Revenue from sales is recognized when control of the products has transferred, being when the products are delivered to the customer, the customer has full discretion over the channel and price to sell / consume the products, and there is no unfulfilled obligation that could affect the customer's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customer, and either the customer has accepted the products in accordance with the sales contract or the acceptance provisions have lapsed.

Company has 2 main streams of revenue:

- i. Sale of goods to Customers – Company recognizes revenue when the goods are delivered to its customer since the customer does not have right to return material unless it has confirmation from the Company.
- ii. Export sales – Company recognize revenue when the goods are delivered on FOB basis; since the customer does not have right to return material unless it has confirmation from the Company.

Revenue is measured net of discounts, incentives, rebates etc. given to the customers on the Company's sales. The Company's presence across different marketing regions within the country and the competitive business makes the assessment of various type of discounts, incentives and rebates as complex and judgmental.

Dividend & Interest income

Dividend income from investments if any to be recognized only when the shareholder's right to receive payment has been established (provided that it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably).

Interest income from a financial asset is recognized when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

g. Leases As a lessee

The company recognizes a Right-of-use (ROU) Asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain re-measurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, company's incremental borrowing rate. Generally, the company uses its incremental borrowing rate as the discount rate. The lease liability is measured at amortized cost using the effective interest method.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

As a Lessor

Leases for which the Company is a lessor is classified as a finance or operating lease. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.

For operating leases, rental income is recognized on a straight-line basis over the term of the relevant lease.

Note: The Company has all lease contracts as Operating Lease during the year under Audit as per above mentioned policies.

h. Foreign exchange translation

The functional currency of the Company is Indian Rupees which represents the currency of the primary economic environment in which it operates.

Transactions in foreign currencies are initially recorded by the Company at its functional currency spot rates at the date the transaction first qualifies for recognition.

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions are generally recognized in profit or loss.

Monetary balances arising from the transactions denominated in foreign currency are translated to functional currency using the exchange spot rate as on the reporting date. Any gains or loss on such translation, are generally recognized in profit or loss.

Foreign exchange differences regarded as an adjustment to borrowing costs are presented in the Statement of Profit and Loss, within finance costs. All other foreign exchange gains and losses are presented in the Statement of Profit and Loss on a net basis within other gains/(losses).

In determining the spot exchange rate to use on initial recognition of the related asset, expense or income (or part of it) on the derecognition of a non-monetary asset or non-monetary liability relating to advance consideration, the date of the transaction is the date on which the Company initially recognises the non-monetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, the Company determines the transaction date for each payment or receipt of advance consideration.

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Note: The Company had not any foreign transaction exposures during the year under audit.

i. Taxes on Income

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the Statement of Profit and Loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using tax rates and laws that have been enacted or substantively enacted by the end of the reporting period. Provision for current tax is made after taken into consideration benefits admissible under the provisions of Section 115BAA of the Income Tax Act, 1961.

Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the Financial Statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary

differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognized if the temporary difference arises from the initial recognition of goodwill.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are re-assessed at each reporting date and are recognized to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognized in correlation to the underlying transaction either in Other Comprehensive Income or directly in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Current and deferred tax expense is recognized in the Statement of Profit and Loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity respectively.

j. Borrowing costs

Borrowing costs, if any, general or specific, that are directly attributable to the acquisition or construction of qualifying assets is capitalized as part of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for intended use. All other borrowing costs are charged to the Statement of Profit and Loss.

The Company determines the amount of borrowing costs eligible for capitalization as the actual borrowing costs incurred on that borrowing during the year less any interest income earned on temporary investment of specific borrowings pending their expenditure on qualifying assets, to the extent that an entity borrows funds specifically for the purpose of obtaining a qualifying asset. In case if the Company borrows generally and uses the funds for obtaining a qualifying asset, borrowing costs eligible for capitalization are determined by applying a capitalization rate to the expenditures on that asset.

k. Provisions, Contingent Liabilities and Contingent Assets

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

Provisions for restructuring are recognized by the Company when it has developed a detailed formal plan for restructuring and has raised a valid expectation in those affected that the Company will carry out the restructuring by starting to implement the plan or announcing its main features to those affected by it.

Provisions are measured at the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, it's carrying amount is the present value of those cash flows (when the effect of the time value of money is material). The measurement of provision for restructuring includes only direct expenditures arising from the restructuring, which are both necessarily entailed by the restructuring and not associated with the ongoing activities of the Company.

Contingent liabilities being a possible obligation as a result of past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more future events not wholly in control of the Company are not recognized in the accounts. The nature of such liabilities and an estimate of its financial effect are disclosed in notes to the Financial Statements unless the probability of an outflow of resources is remote. Contingent assets are not recognized but are disclosed in the notes where an inflow of economic benefits is probable.

I. Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

(a) Financial assets**(i) Initial recognition and measurement**

At initial recognition, financial asset is measured at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

(ii) Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in following categories:

- a) at amortized cost; or
- b) at fair value through other comprehensive income; or
- c) at fair value through profit or loss. The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

Business model assessment

The company determines its business model at the level that best reflects how it manages Companies of financial assets to achieve its business objective.

The company business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors such as:

- (i) How the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel
- (ii) The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed
- (iii) How managers of the business are compensated (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected)
- (iv) he expected frequency, value and timing of sales are also important aspects of the Company's assessment

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realized in a way that is different from the Company's original expectations, the Company does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

The Solely payments of Principal and Interest test

As a second step of its classification process the Company assesses the contractual terms of financial to identify whether they meet the SPPI test.

The most significant elements of interest within a lending arrangement are typically the consideration for the time value of money and credit risk. To make the SPPI assessment, the Company applies judgement and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the interest rate is set.

In contrast, contractual terms that introduce a more than de minimize exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement do not give rise to contractual cash flows that are solely

payments of principal and interest on the amount outstanding. In such cases, the financial asset is required to be measured at FVTPL.

Amortized cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortized cost. Interest income from these financial assets is included in finance income using the effective interest rate method (EIR).

Fair value through other comprehensive income (FVOCI): Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at fair value through other comprehensive income (FVOCI). Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognized in Statement of Profit and Loss. When the financial asset is derecognized, the cumulative gain or loss previously recognized in OCI is reclassified from equity to Statement of Profit and Loss and recognized in other gains/ (losses). Interest income from these financial assets is included in other income using the effective interest rate method.

Fair value through profit or loss: Assets that do not meet the criteria for amortized cost or FVOCI are measured at fair value through profit or loss. Interest income from these financial assets is included in other income.

Equity instruments: All equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading and contingent consideration recognized by an acquirer in a business combination to which Ind AS103 applies are classified as at FVTPL. For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument- by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the profit and loss.

(iii) Impairment of financial assets

In accordance with Ind AS 109, Financial Instruments, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on financial assets.

For recognition of impairment loss on financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If in subsequent years, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognizing impairment loss allowance based on 12-month ECL.

Life time ECLs are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the year end.

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all shortfalls), discounted at the original EIR. When estimating the cash flows, an entity is required to consider all contractual terms of the financial instrument (including prepayment, extension etc.) over the expected life of the financial instrument. However, in rare cases when the expected life of the financial instrument cannot be estimated reliably, then the entity is required to use the remaining contractual term of the financial instrument.

ECL impairment loss allowance (or reversal) recognized during the year is recognized as income/expense in the statement of profit and loss. In balance sheet ECL for financial assets measured at amortized cost is presented as an allowance, i.e. as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount.

Until the asset meets write off criteria, the Company does not reduce impairment allowance from the gross carrying amount.

Company measures the loss allowance at an amount equal to lifetime expected credit losses for Trade receivables (i.e. 'simplified approach').

Trade receivables are written off when there is no reasonable expectation of recovery.

(iv) Derecognition of financial assets

A financial asset is derecognized only when

- a) the rights to receive cash flows from the financial asset is transferred or
- b) retains the contractual rights to receive the cash flows of the financial asset, but assumes a contractual obligation to pay the cash flows to one or more recipients.

Where the financial asset is transferred then in that case financial asset is derecognized only if substantially all risks and rewards of ownership of the financial asset is transferred. Where the entity has not transferred substantially all risks and rewards of ownership of the financial asset, the financial asset is not derecognized.

(b) Financial liabilities**Classification as debt or equity**

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognized at the proceeds received, net of direct issue costs.

(i) Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss and at amortized cost, as appropriate.

All financial liabilities are recognized initially at fair value and, in the case of borrowings and payables, net of directly attributable transaction costs.

(ii) Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Gains or losses on liabilities held for trading are recognized in the Statement of Profit and Loss.

Financial liabilities at amortized cost

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the EIR method. Gains and losses are recognized in Statement of Profit and Loss when the liabilities are derecognized as well as through the EIR amortization process. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the Statement of Profit and Loss. Presently Company has not included transaction costs based on materiality.

The Company's Financial liabilities include Trade and other payables, loans and borrowings including Bank overdrafts, and Bank Term Loans.

Financial guarantee contracts

Financial guarantee contracts issued by the Company are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognised less, when appropriate, the cumulative amount of income recognised in accordance with the principles of Ind AS 115.

(iii) Derecognition

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the Statement of Profit and Loss as finance costs.

m. Derivative**1) Financial Instruments****Initial recognition and subsequent measurement**

The Company uses derivative financial instruments, such as forward currency contracts, options and interest rate swaps to hedge its foreign currency risks and interest risk respectively. Such derivative financial instruments are initially recognized at fair value through profit or loss (FVTPL) on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Any gains or losses arising from changes in the fair value of derivative financial instrument are recognized in the statement of profit and loss.

2) Commodity Contracts:**Initial recognition and subsequent measurement**

The Company enters into purchase and sale contracts of commodities for own use as well as to hedge price risk. These contracts form part of the Company's overall business portfolio. The Company has elected an irrevocable option to designate its own use contracts at FVTPL (in line with derivative contracts) to eliminate or significantly reduce accounting mismatch of business income. Purchase and sale contracts are initially recognized at FVTPL on the date on which contract is entered into and are subsequently re-measured to their fair value at the end of each reporting period. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Any gains or losses arising from changes in the fair value of commodity contracts are recognized in the statement of profit and loss under the head "Raw Materials Consumed".

n. Fair value measurement

The Company measures financial instruments, such as, derivatives at fair value at each balance sheet date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the financial asset or settle the financial liability takes place either

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1: Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2: Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3: Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

At each reporting date, the Management analyses the movements in the values of assets and liabilities which are required to be remeasured or re-assessed as per the Company's - accounting policies.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

o. Cash & cash equivalents

Cash and cash equivalent in the Balance Sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to insignificant risk of changes in value.

p. Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issuance of new ordinary shares and share options and buyback of ordinary shares, if any are recognized as a deduction from equity, net of any tax effects.

Equity shares are classified under Equity. Company has deferred the transactional / pre-ipo costs (classified under Other Current Assets) till the allotment of share in the proposed IPO & the same will be added to the Equity of the company.

q. Offsetting financial instrument

Financial assets and liabilities are offset and the net amount is reported in the balance sheet where there is a legally enforceable right to offset the recognized amounts and there is an intention to settle financial asset and liability on a net basis or realize the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Company or the counterparty.

r. Segments reporting

Segments are identified having regard to the dominant source and nature of risks and returns and the internal organization and management structure. The Company has considered as Business Segments as Primary Segments.

(i). Segments Accounting Policies

The Company prepares its Segment Information in conformity with the accounting policies adopted for preparing and presenting the financial statements of the Company as a whole.

(ii). Inter - Segment Transfer

The Company generally accounts the Inter - Segment transfers at an agreed value of the transactions.

(iii). Allocation of Common Costs

Common allocable costs are allocated to each segment reporting according to the relative contribution of each segment to the total of common costs.

(iv). Unallocated Items

Unallocated Items include the General Corporate Income and Expense items which are not allocated to any of the Business Segments.

s. Earnings per share**Basic earnings per share**

Basic earnings per share is computed by dividing the net profit after tax by weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the year is adjusted for treasury shares, bonus issue, bonus element in a rights issue to existing shareholders, share split and reverse share split (consolidation of shares).

Diluted earnings per share

Diluted earnings per share is computed by dividing the profit after tax after considering the effect of interest and other financing costs or income (net of attributable taxes) associated with dilutive potential equity shares by the weighted average number of equity shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares including the treasury shares held by the Company to satisfy the exercise of the share options by the employees.

t. Government Grant

Grants from the government are recognized when there is reasonable assurance that the Company will comply with the conditions attached to them and the grant will be received. When the grant relates to expense item, it is recognized as income on a systematic basis over the periods that the related costs, for which it is intended to compensated, are expensed. Where the grant relates to assets, it is recognized as deferred income and released to income in equal amounts over the expected useful life of the related asset.

u. Employee Benefits**(1) Short – Term Employee Benefits:**

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognized as an expense during the period when the employees render the services.

(2) Post – Employment Benefits:**(a) Defined Contribution Plans:**

The Company recognizes contribution payable to the provident fund scheme as an expense, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognized as an asset to the extent that the pre-payment will lead to a reduction in future payment or a cash refund.

(b) Defined Benefit Plans:**(i) Gratuity Scheme:**

The Company pays gratuity to the employees who have completed five years of service with the company at the time of resignation / superannuation. The gratuity is paid @ 15 days basic salary for every completed year of service as per the Payment of Gratuity Act, 1972. The liability in respect of gratuity and other post-employment benefits is calculated using the Projected Unit Credit Method and spread over the period during which the benefit is expected to be derived from employee's service.

Re-measurement gains and losses arising from adjustments and changes in assumptions are recognized in the period in which they occur in Other Comprehensive Income.

(c) Other Long-Term Employee Benefits:

Entitlement to annual leave is recognized when they accrue to employees.

v. Measurement of EBITDA

The Company has opted to present earnings before interest (finance cost), tax, depreciation and amortization (EBITDA) as a separate line item on the face of the Statement of Profit and Loss for the period. The company measures EBITDA based on profit/(loss) from continuing operations.

w. Events after Reporting Date

Where events occurring after the Balance Sheet date provide evidence of condition that existed at the end of reporting period, the impact of such events is adjusted within the financial statements. Otherwise, events after the Balance Sheet date of material size or nature are only disclosed.

NOTE: 35 Financial Instruments, Fair Value Measurements, Financial Risk and Capital Management

A) Financial Assets and Liabilities

The Group's principal financial assets include loans and trade receivables, investments, cash and cash equivalents and other receivables. The Group's principal financial liabilities other than derivatives comprise of borrowings, provisions, trade and other payables. The main purpose of these financial liabilities is to finance the Group's operations and projects.

B) Fair Value Hierarchy

The fair value hierarchy is based on inputs to valuation techniques that are used to measure fair value that are either observable or unobservable and consists of the following three levels:

Level-1: Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level-2: Inputs are other than quoted prices included within Level-1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level-3: Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on the assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data.

D) FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Group's Financial Risk management is an integral part of how to plan and execute its business strategies. The Group's risk management activities are subject to the management direction and control under the framework of Risk Management Policy as approved by the Board of Directors of the Company. The Management ensures appropriate risk governance framework for the Group through appropriate policies and procedures and that risks are identified, measured and managed in accordance with the Group's policies and risk objectives.

In the ordinary course of business, the Group is mainly exposed to risks resulting from interest rate movements (Interest rate risk), Commodity price changes (Commodity risk) and exchange rate fluctuation (Currency risk) collectively referred as Market Risk, Credit Risk, Liquidity Risk and other price risks such as equity price risk. The Group's senior management oversees the management of these risks.

(I) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk, such as equity price risk and commodity risk.

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company exposure to the risk of changes in market interest rates relates primarily to the Company's debt obligations with floating interest rates.

Interest rate sensitivity

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of loans and borrowings. With all other variables held constant, the Company's profit before tax is affected through the impact on floating rate borrowings, as follows:

Years	Outstanding Borrowing Amount	Increase / Decrease in basis points	Impact on Profit Before Tax

Foreign Currency Risk

The Group operates internationally and portion of the business is transacted in several currencies and consequently the Group is exposed to foreign exchange risk through its sales and services in overseas and purchases from overseas suppliers in various foreign currencies.

The Group evaluates exchange rate exposure arising from foreign currency transactions and Group follows established risk management policies including the use of derivatives like foreign exchange forward and options to hedge exposure to foreign currency risks.

Note : The Company has not entered any foreign Currency transaction and related exposures

(II) Credit risk

Credit risk refers to the risk that a counterparty or customer will default on its contractual obligations resulting in a loss to the Group. Financial instruments that are subject to credit risk principally consist of Loans, Trade and Other Receivables, Cash & Cash Equivalents, Investments and Other Financial Assets. The carrying amounts of financial assets represent the maximum credit risk exposure.

Credit risk encompasses both, the direct risk of default and the risk of deterioration of creditworthiness as well as concentration of risks. Credit risk is controlled by analysing credit limits and creditworthiness of counter parties on continuous basis with appropriate approval mechanism for sanction of credit limits.

Other Financial Assets

Credit risk from balances with banks, financial institutions and investments is managed by the Group's treasury team in accordance with the Group's risk management policy. Cash and cash equivalents and Bank deposits are placed with banks having good reputation, good past track record and high quality credit rating.

Trade Receivables

Receivables are deemed to be past due or impaired with reference to the Group's normal terms and conditions of business. These terms and conditions are determined on a case to case basis with reference to the customer's credit quality and prevailing market conditions. Receivables that are classified as 'past due' are those that have not been settled within the terms and conditions that have been agreed with that customer.

The credit quality of the Group's customers is monitored on an ongoing basis and assessed for impairment where indicators of such impairment exist. The solvency of the debtor and their ability to repay the receivable is considered in assessing receivables for impairment. Where receivables have been impaired, the Group actively seeks to recover the amounts in question and enforce compliance with credit terms.

Liquidity risk refers the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities. Phased implementation of Unified Payments Interface

SEBI has Offer UPI Circulars in relation to streamlining the process of public offer of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public offer closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a) Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Retail Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public offer closure to listing continued to be six Working Days.
- b) Phase II: This phase has commenced with effect from July 01, 2019 and will continue for a period of three months or floating of five main board public offers, whichever is later. Under this phase, submission of the Bid cum Application Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds has been discontinued and has been replaced by the UPI Mechanism. However, the time duration from public offer closure to listing continues to be six Working Days during this phase. SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice.
- c) Phase III: Subsequently, the time duration from public offer closure to listing would be reduced to be three Working Days.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted

applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – Offer BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public offers shall also provide the facility to make application using UPI. The Company will be required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the Retail Individual Bidders using the UPI.

The processing fees for applications made by Retail Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Offer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Offer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Offer, in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Offer Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.
